

Fitness landscape slices, RL OFF — one plane per run, anchored on that run's own trajectory —
baseline environment
viability threshold 0.136

Evolution — weakest runs
($f < 0.272$, a median split
— still above viability)

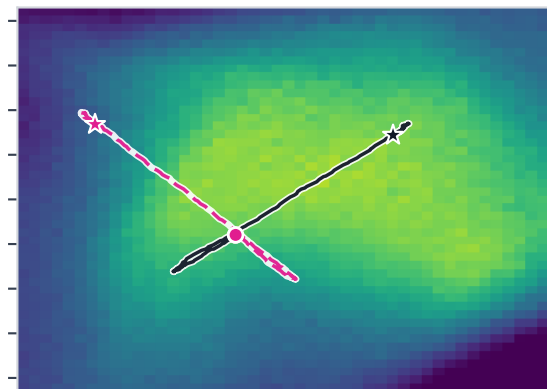

seed 2007 · run $f = 0.268$ · plane 64%
100.0% viable

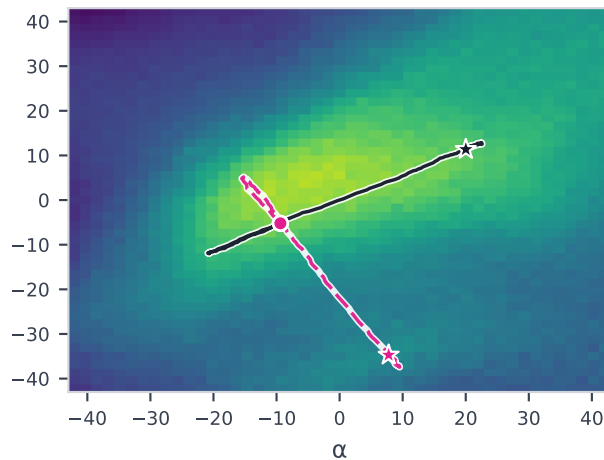

seed 2004 · run $f = 0.267$ · plane 64%
99.7% viable

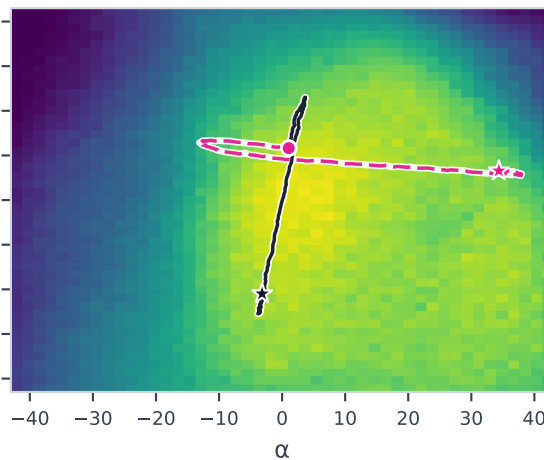

seed 2003 · run $f = 0.265$ · plane 64%
98.4% viable

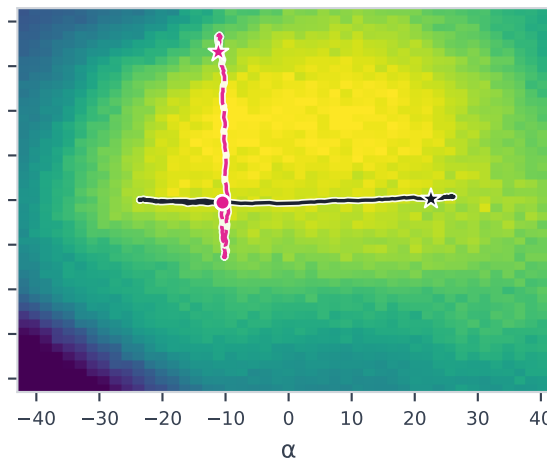

seed 2002 · run $f = 0.277$ · plane 63%
100.0% viable

seed 2006 · run $f = 0.276$ · plane 63%
100.0% viable

seed 2008 · run $f = 0.275$ · plane 63%
99.2% viable
