

Fitness landscape slices, RL ON — identical cells and identical maps, in-lifetime learning enabled
 — baseline environment
 viability threshold 0.136

Evolution — weakest runs
 ($f < 0.272$, a median split
 — still above viability)

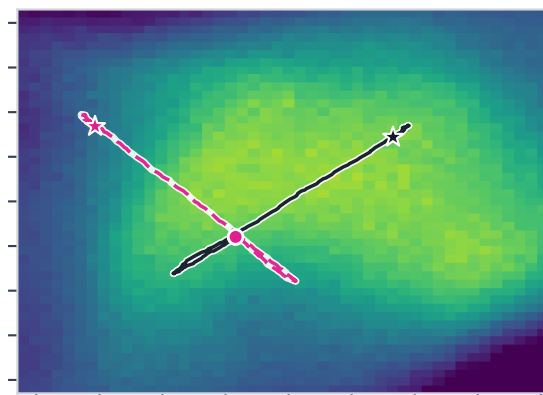

seed 2007 · run $f = 0.268$ · plane 64%
 100.0% viable

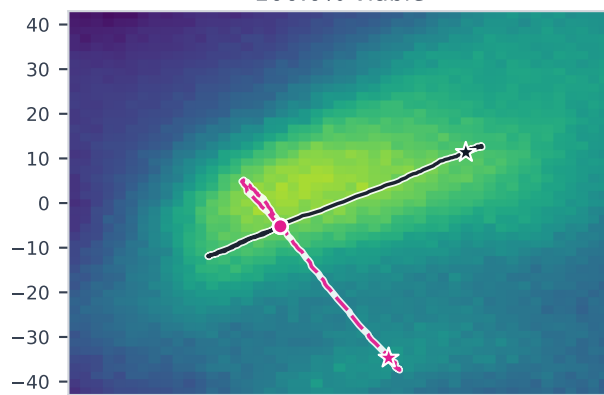

seed 2004 · run $f = 0.267$ · plane 64%
 99.9% viable

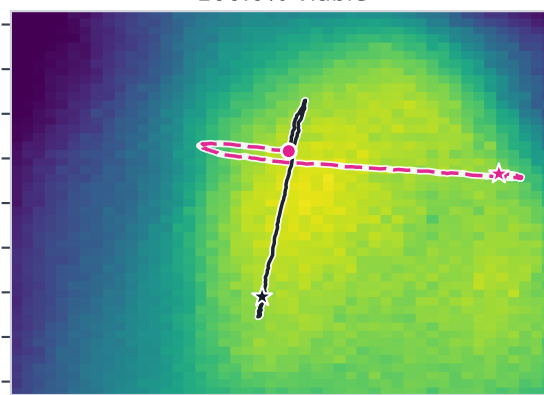

seed 2003 · run $f = 0.265$ · plane 64%
 98.7% viable

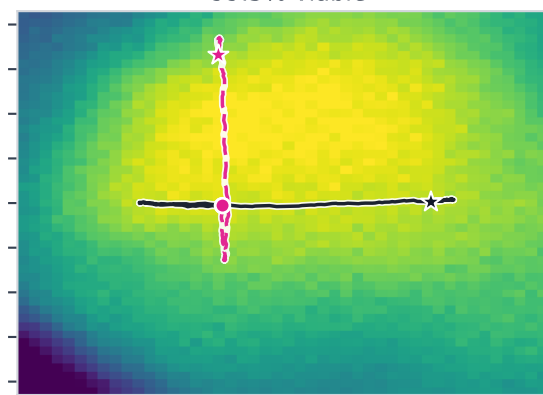

seed 2002 · run $f = 0.277$ · plane 63%
 100.0% viable

seed 2006 · run $f = 0.276$ · plane 63%
 100.0% viable

seed 2008 · run $f = 0.275$ · plane 63%
 99.5% viable

$f(\theta)$ with RL on — normalised

Evolution — succeeded

— evolution run

— learning run
