

Fitness landscape slices, RL OFF — one plane per run, anchored on that run's own trajectory —
 predator environment
 viability threshold 0.136

Evolution — failed ($f < 0.136$, below viability)

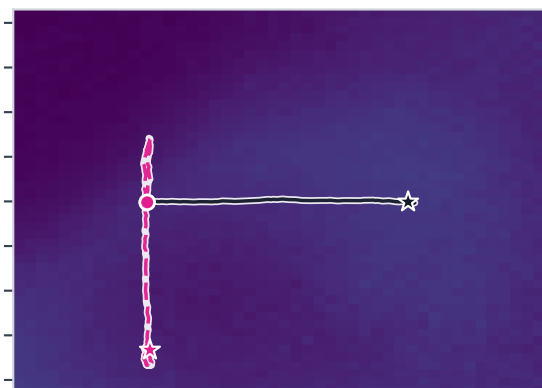

seed 2005 · run $f = 0.106$ · plane 69%
 60.2% viable

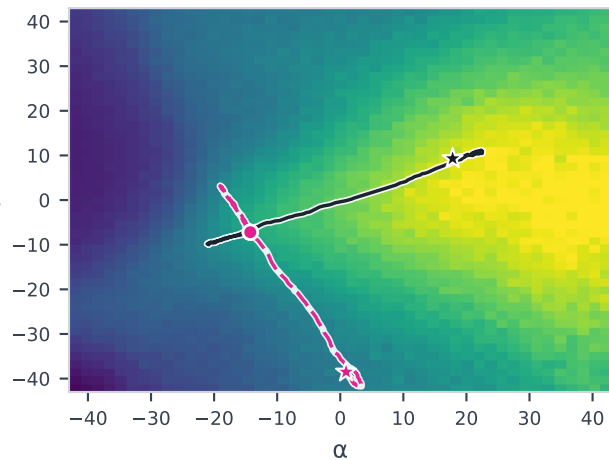

seed 2008 · run $f = 0.104$ · plane 69%
 64.4% viable

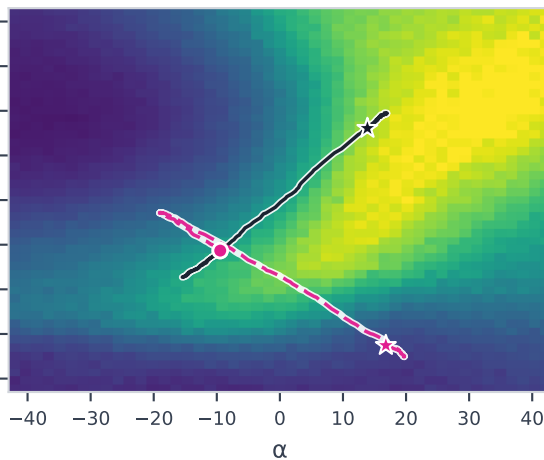

seed 2004 · run $f = 0.102$ · plane 69%
 15.3% viable

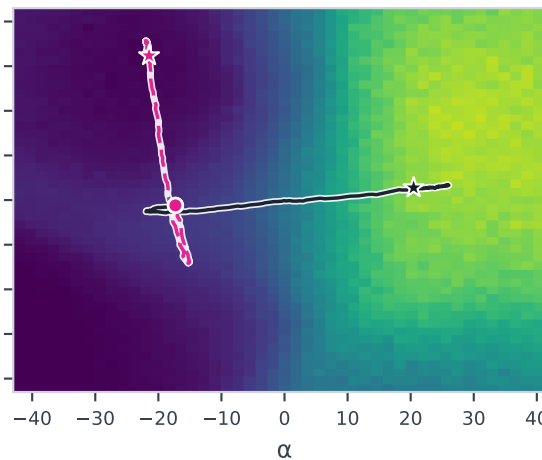

seed 2007 · run $f = 0.262$ · plane 62%
 94.5% viable

seed 2002 · run $f = 0.262$ · plane 62%
 88.5% viable

seed 2001 · run $f = 0.262$ · plane 64%
 61.7% viable
